

OPENGENUS

Letter of Recommendation

Date: 26th September 2020

To whom so ever it may concern

This is to acknowledge that **Priyanshi Sharma** has been a **Software Developer, Intern** at **OpenGenus** from 5th April 2020 to 14th September 2020. It has been a great pleasure to work with her and has proved to be a valuable asset for the entire team.

Priyanshi had contributed to our community even before our Internship and has been enthusiastic all along. She has readily taken up new challenges. She has contributed to **OpenGenus IQ** by exploring and writing articles on a wide range of topics such as exploring AIML to build chatbots to algorithmic ideas like Binary Space Partitioning Trees.

We suggest everyone to read her published work at iq.opengenus.org/author/priyanshi

It has been an immense pleasure to work with her and we, highly, recommend her for any challenging technical or research role in a dynamic team all over the World.

Warm regards,

Aditya Chatterjee,

Founding member,

OpenGenus.
